Type of Sample: **URINE FOR CHLAMYDIA TESTING**

- Use a sterile plastic container with a lid to collect the sample (available at the laboratory).
- It is recommended to collect the **first stream of the first morning urine**.
(In urgent cases, the sample may be collected at least 1 hour after last urination.)
- No genital cleansing is required before urination.
- Collect the first part of the urine stream, in an amount of 20–50 ml, up to the marked line on the container.
(Please follow this instruction carefully!)
- Write the date and time of collection on the container.
- Bring the sample to the laboratory on the same day, between 7:00 and 20:00 (on Saturdays until 14:00).
